We the undersigned are concerned by the possibility that Katzy's may close. This would be a disaster for us, the kosher consumers of Sydney, as it is the one affordable modern kosher eatery and take-away store in Sydney with an acceptable variety of product. Furthermore there are many borderline kosher consumers, and families with young children, who rely heavily on the kind of product offered by Katzy's to supplement the kosher meals they prepare at home. It has been made further difficult as recently other kosher establishments have closed. The closure of Katzy's will be the metaphorical "straw that broke the camel's back" and force some kosher consumers over the line of buying unsupervised, and in all likelihood, non-kosher food.

We believe that it is the responsibility of the KA to not only maintain high standards of kashrut but equally important to play a role in enabling the largest number of people to observe kashrut.

We ask the KA to work together with all kosher establishments and the community in finding a solution that will enable Katzy's and other kosher establishments to remain open. There has to be a solution & if we all work together as a united front we will be able to achieve one.
